PROFESSIONAL SUMMARY

Data Engineer with 3.5+ years of experience building scalable cloud-native data platforms, modernizing enterprise data ecosystems, and delivering large-scale migration projects involving 20+ TB of data in Agile environments. Proven track record of developing high-performance data solutions that process 100+ GB workloads, modernizing 50+ ETL/ELT pipelines, and reducing execution time by up to 42% using Microsoft Fabric, Azure, Databricks, PySpark, Python, SQL, and Generative AI. Incoming M.S. in Computer Science (OMSCS) student at Georgia Tech (Fall 2026).

TECHNICAL SKILLS

Languages: Python, SQL

Data Engineering: Microsoft Fabric, Azure Databricks, PySpark, Spark SQL, Delta Lake, Lakehouse, ETL/ELT, Data Warehousing, Metadata-driven ETL, SCD Type 1/2, Incremental Processing

Cloud: Azure (ADLS, ADF, Azure Functions), AWS (S3, Glue, Lambda)

Databases: SQL Server, Oracle, PostgreSQL, Snowflake, Greenplum, MongoDB

Performance: Partitioning, Z-Ordering, Liquid Clustering, Broadcast Joins, Caching, Performance Tuning

AI & Tools: Generative AI, LangChain, Pinecone, Airflow, Databricks Workflows, Git, GitHub, Informatica, Alteryx, Power BI

PROFESSIONAL EXPERIENCE

Deloitte

Bengaluru, Karnataka

Data Engineer

Apr 2026 – Present

- Built a cloud-native Microsoft Fabric Lakehouse platform to modernize **20+ TB** of SAP B1 and SAP BW data (since 2014) using Microsoft Fabric, OneLake, PySpark, Python, SQL, Delta Lake, and Azure.
- Designed metadata-driven ingestion pipelines for **2,000+ dealer-specific tables**, implementing reusable data quality, validation, and enterprise integration frameworks to reduce manual intervention.
- Developed incremental ingestion, SCD handling, and Delta Lake transformation pipelines to deliver curated Power BI datasets supporting near real-time analytics and enterprise reporting.

Genpact (Internal LE Movement; Enquero -> Genpact)

Bengaluru, Karnataka

Data Engineer

May 2024 – Apr 2026

- Modernized enterprise data platforms by migrating **100+ Informatica mappings** and **2+ TB** of enterprise data from Oracle to Databricks using PySpark, Spark SQL, Delta Lake, SQL, and metadata-driven ETL frameworks.
- Optimized distributed data pipelines processing **10+ million records**, reducing execution time from **8 hours to 40 minutes (42% improvement)** through incremental processing, Delta optimization, partitioning, and performance tuning.
- Built pricing and marketing analytics pipelines, implemented fuzzy matching for customer analytics, and leveraged Generative AI to accelerate legacy ETL analysis, transformation mapping, and validation rule generation.

Enquero Global (Acquired by Genpact)

Bengaluru, Karnataka

Data Engineering Intern

Aug 2023 – Apr 2024

- Developed **GMigrate**, a metadata-driven migration framework to automate enterprise database migrations from Oracle, PostgreSQL, and Snowflake to Databricks using Python, PySpark, and SQL.
- Built **GValidate**, an automated validation framework supporting row-level, cell-level, and business-rule validation, significantly reducing manual verification effort and improving migration quality.
- Designed reusable migration automation components, metadata-driven execution pipelines, and data quality frameworks to accelerate enterprise database modernization projects.

EDUCATION

Georgia Institute of Technology	Incoming M.S. Computer Science (OMSCS), Fall 2026	Nitte
Meenakshi Institute of Technology	B.E. Information Science, CGPA: 9.14/10	

CERTIFICATIONS AND TRAININGS

-
- Databricks Data Engineer Professional • Databricks Data Engineer Associate
 - Microsoft Azure Fundamentals • NPTEL Artificial Intelligence
